<b>Pomace oil 10°</b>										0.71	0.69	
<b>Refined pomace oil</b>										1.21	1.07	1.19

During the 1st fortnight of July prices remained stable. Some modest optimism seen in the area of Heraklion for extrissima which show good organoleptic characteristics. Elsewhere, as in Messinia, the transactions are holding back expecting better prices. Lakonia movw in rythms of maintenance such as Lesvos where the production of the new year is expected to reach 12-15 thousand tn.

\* These are tank prices (in bulk) at the exit of the oil mill. Is the level considered as the most representative and internationally in Spain and Italy.
